

Thermo Fisher Scientific FACTORY TOUR

 The world leader in serving science

Step Into Our World

Did you know that Brno is considered „The capital of electron microscopy“?

Every third electron microscope in the world comes from here.

- Take a look inside the unique production facilities where electron microscopes and spectrometers worth millions of dollars are made.
- During a 90-minute excursion, we will explain how our devices are made and how they are manufactured.
- You will take a look inside the cleanest production facilities in Brno, where there are fewer dust particles than in an operating room.

Our commitment to scientific advancement

We build products and solutions that enable customers to push the boundaries of innovation.

A group of diverse young children are leaning over a stone ledge, playing in a shallow pool of water. Water droplets are captured in mid-air around them, creating a sense of movement and joy. The background shows a blurred urban setting with buildings and trees.

Our Mission is our purpose:

**To enable our
customers to make
the world healthier,
cleaner and safer**

Healthier

We make a positive impact on human health by providing our customers with advanced technologies and expertise to deliver breakthrough medicines and diagnostics that improve lives worldwide. Our customers rely on us to help them achieve the impossible.

Cleaner

We empower our customers with the tools to understand and address climate change, develop greener technologies and to help ensure the quality of air and water that sustains all life. As their partner, we are working with our customers to preserve our planet for future generations.

Safer

From products that detect contamination in food, to instruments that help solve crimes and identify potential threats, we provide the solutions that enable our customers to protect our communities. Together, we are determined to create a safer world.

WE LOOK FORWARD TO SEEING YOU
